

July 2019

New, separate reimbursement for long-acting, reversible contraception devices

Summary: Statewide Medicaid Managed Care Managed Medical Assistance members will soon have the benefit of immediate postpartum placement (IPP) of long-acting, reversible contraception (LARC) (intrauterine devices and etonogestrel implants) during their inpatient delivery admission.

What is the impact of this change?

Beginning October 25, 2017, payment for LARC devices and professional insertion fees will be paid separately from inpatient admissions. Facilities and providers will receive the same reimbursement as if the device was implanted on an outpatient basis.

This new, separate reimbursement applies to hospital claims with dates of service on or after October 25, 2017, for LARC devices only. Providers must bill separately for their professional services. It does not include other related services, procedures, supplies and devices that will continue to be included in the inpatient hospital diagnosis-related group or the birthing center all-inclusive reimbursement amount.

To receive separate reimbursement for LARC devices, facility providers must submit claims using the appropriate HCPCS code listed below:

HCPCS code	Description
J7300	Intrauterine copper contraceptive, 10-year duration (ParaGard®)
J7301	Levonorgestrel-releasing intrauterine contraceptive system, 13.5 mg, three-year duration (Skyla®)
J7307	Etonogestrel (contraceptive) implant system including implant and supplies, three-year duration (Nexplanon®)
J7297	Levonorgestrel-releasing intrauterine contraceptive system, 52 mg, three-year duration, 52 mg, three-year duration (Liletta®)
J7298	Levonorgestrel-releasing intrauterine contraceptive system, 52 mg, five-year duration (Mirena®)
Q9984	Levonorgestrel-releasing intrauterine system, 19.5 mg, five-year duration (Kyleena®)

What is the Florida IPP LARC Quality Initiative?

The Florida IPP LARC Quality Initiative is a collaborative effort between the Agency for Health Care Administration, the Florida Perinatal Quality Collaborative (FPQC), Florida Department of Health and other key partners to raise awareness on family planning options; provide operational guidance; clarify policy changes needed for IPP LARC implementation; and to

improve access to various contraceptive methods among Florida residents, including vulnerable populations.

FPQC is conducting a quality improvement project, Access LARC Initiative, to provide training and resources to help Florida hospitals set up delivery and billing systems needed for IPP LARC implementation. Hospitals interested in participating in this initiative should visit <http://health.usf.edu/publichealth/chiles/fpqc/larc> for more information.

What if I need assistance?

For more information or if you have questions about this communication or need help with any other item, contact your local Provider Relations representative or call Provider Services at **1-844-405-4296**.
